GitHub: <https://github.com/badcarolwork>

Portfolio Summary

A collection of frontend engineering projects demonstrating experience in React, JavaScript, interactive web experiences, REST API integration, responsive design, browser APIs, and animation. These projects showcase production-ready UI development, performance optimization, and modern frontend workflows.

VenueVerse – Global Concert Venue Explorer

A responsive web application for discovering concert venues worldwide with venue information, seating layouts, galleries, and event history.

Tech Stack	Next.js • React • TypeScript • REST API • Tailwind
Live site	https://venueverse-mu.vercel.app/
Github	https://github.com/badcarolwork/venueverse
Key Features	• Worldwide venue search • Seat plan exploration • Venue photo gallery • Event history browsing

PDF & Excel Export Tool

Browser-based utility for exporting dynamic data into PDF and Excel without server-side processing.

Tech Stack	Next.js • React • TypeScript • PDF Export • Excel Export
Links	https://badcarolwork.github.io/pdf-excel/
GitHub	https://github.com/badcarolwork/pdf-excel
Key Features	• Dynamic PDF / Excel format generation • Client-side processing • Browser workflow

Animated Landing Page - Homepage

Marketing landing page featuring smooth animations, lead generation, and responsive design.

Tech Stack	HTML5 • CSS3 • JavaScript • GSAP
Links	https://kult.my/creators/
Key Features	• Responsive landing page • Lead generation form with POST • Animated transitions

Interactive Mini Game

Interactive browser game created to improve user engagement during digital campaigns.

Tech Stack	JavaScript • CSS Animation
Links	http://elicodigital.com/ccproject/event-site/
Key Features	• Interactive gameplay • Animation effects • Responsive experience • User engagement

Rich Media Banner Platform

Interactive advertising experiences built for digital marketing campaigns with rich animations and responsive layouts.

Tech Stack	HTML5 • CSS3 • JavaScript • GSAP
Links	https://performics.com.tw/ https://kult.my/gallery/
Key Features	• Interactive banner experiences • Advanced GSAP animations • Responsive layouts • Cross-browser compatibility

Party Cam

A browser camera application using the MediaDevices API for capturing photos directly in the browser.

Tech Stack	JavaScript • MediaDevices API
Links	https://badcarolwork.github.io/party-cam/
Key Features	• Camera access thru browser • Photo capture • Browser API integration • Permission handling
